

# HRP Goat Anti-Rabbit Recombinant Secondary Antibody

**Cat:**HKS23208**Company:** Haokebio**Organism:**Goat**Applications:**ELISA:1:1000-1:5000**Species reactivity:**Rabbit

WB:1:1000-1:5000

**Background:**

HKS23208 targets to Rabbit IgG (H+L) in ELIS A and Western blot. It is highly specific to rabbit IgG and shows minimal reactivity for mouse, rat, human, pig, and bovine IgGs. Recombinant Secondary Antibodies are mixtures of precisely engineered recombinant monoclonal antibodies that recognize multiple complementary epitopes on the same IgG. Each recombinant clone in the final multiclonal mixture is carefully selected after rigorous characterization and screening to ensure the highest level of performance. The selected clones are mixed in various combinations, each of which is then functionally characterized in multiple applications to select the final multiclonal mixture with optimal performance. Each lot of Multi-rAb™ Secondary Antibodies is produced by mixing the same high performing recombinant clones every time to ensure that they have high batch-to-batch consistency, which in turn results in high reproducibility of experimental data.

Store at -20 °C for one year.

**Note:**

This product is for research use only, not for diagnostic or the therapeutic use.

货号: HKS23208  
应用: WB

HRP-Goat Anti-Rabbit Recombinant Secondary Antibody (H+L) was used at 1:5000 for detection.

**Source of Reagents:**

发表[中文论文]请标注:HRP Goat Anti-Rabbit(HKS23208)  
由杭州浩克生物技术有限公司提供;

发表[英文论文]请标注:HRP Goat Anti-Rabbit(HKS23208)  
) were kindly provided by Hangzhou Haoke Biotechnology C  
o., Ltd.

**RRID:**

AB\_3073505

**Clonality:**

Multiclonal recombinant

**Purity:**

The antibody was purified from culture media supernatant by immunoaffinity chromatography using Protein G beads.

**Form:**

Liquid

**Storage Buffer:**

PBS with 50% glycerol, 10 mg/mL BSA, 0.1% Proclin-300, pH 7.4.

**Storage:**
