

HRP Goat Anti-Mouse Recombinant Secondary Antibody

Cat:HKS23207**Company:** Haokebio**Organism:**Goat**Applications:**ELISA:1:1000-1:5000**Species reactivity:**Mouse

WB:1:1000-1:5000

Background:

HKS23207 targets Mouse IgG (H+L) in ELISA and Western blot. It can bind to all mouse IgG isotypes, mouse IgM and IgA as well as rat IgG. It shows minimal reactivity for rabbit, human, pig and bovine IgGs. Recombinant Secondary Antibodies are mixtures of precisely engineered recombinant monoclonal antibodies that recognize multiple complementary epitopes on the same IgG. Each recombinant clone in the final multiclonal mixture is carefully selected after rigorous characterization and screening to ensure the highest level of performance. The selected clones are mixed in various combinations, each of which is then functionally characterized in multiple applications to select the final multiclonal mixture with optimal performance. Each lot of Multi-rAb™ Secondary Antibodies is produced by mixing the same high performing recombinant clones every time to ensure that they have high batch-to-batch consistency, which in turn results in high reproducibility of experimental data.

Storage:

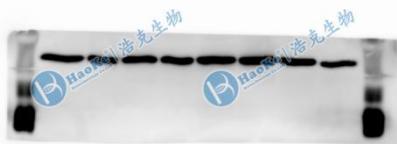

Store at -20 °C for one year.

Note:

This product is for research use only, not for diagnostic or therapeutic use.

HRP Goat Anti-Mouse Recombinant Secondary Antibody
货号: HKS23207
应用: WB

HRP-Goat Anti-Mouse Recombinant Secondary Antibody (H+L) was used at 1:5000 for detection.

Source of Reagents:

发表[中文论文]请标注:HRP Goat Anti-Mouse(HKS23207)由杭州浩克生物技术有限公司提供;
发表[英文论文]请标注:HRP Goat Anti-Mouse(HKS23207) were kindly provided by Hangzhou Haoke Biotechnology Co., Ltd.

RRID:

AB_3068333

Clonality:

Multiclonal recombinant

Purity:

The antibody was purified from culture media supernatant by immunoaffinity chromatography using Protein G beads.

Form:

Liquid

Storage Buffer:

PBS with 50% glycerol, 10 mg/mL BSA, 0.1% Proclin-300, pH 7.4.
